

# IS TOUCH AN IMPORTANT SKILL IN YOUR HEALTH PRACTICE?

How would you like to explore and learn a way of developing touch communication skills beyond techniques and routines?

Deeply rooted in the Shiatsu and Japanese healing and philosophical traditions, the SEIKI-SHIATSU approach to body-mind work is simple and transformative. It demonstrates clearly how the movement of physical and emotional distortions in life can be recognised and transformed, by the development and refinement of Ki-sensitivity, mindful observation and an empathic contact between giver and receiver

Daniela Coronelli is a member teacher of the UK Shiatsu Society and the UK Mindfulness Teachers Listings. She brings to the course her long-term experience in facilitating courses for schools, organisations and private groups, as well as her passion and sense of humour

Open to Shiatsu, Manual Therapy, Yoga and Movement practitioners, and all with a committed interest in refining person to person contact skills.

The weekend workshop offers Mindful touch-communication, meditative and movement skills for enhancing inner and professional practice. It counts towards your CPD, as well as being an opportunity to recharge body and soul in the middle of the beautiful Dartington Gardens
